GitHub Integration -- Alpha Doc Version

Overview

Integrate your SnapLogic account to GitHub repositories to export your project's assets such as File, Pipelines, and Accounts.

Pages in this section:

Key Features

- Checkout GitHub repositories
- Add files to repositories
- Remove files from repositories
- Get latest files from GitHub
- Update file in GitHub from SnapLogic

> Snap Packs and Snaplexes cannot be migrated to GitHub. If there are Snap Packs or Snaplexes in your project, they are listed as *Unsupported* (GitHub Status) in the Asset table.

Prerequisites

- The SnapLogic App must be installed in GitHub. See GitHub: SnapLogic App Installation for details.
- Your GitHub account should have read and write access to your organisation's GitHub repositories.
